### ENERGY STAR® Qualified Models

†For complete information consult written warranty.  
 Δ Height dimension is to the top of the draft diverter for all models except Atmospheric Direct-Vent models.  
 \* For propane model change the "N" to "L"  
 \*\* Atmospheric Direct Vent, PowerFlex® and PowerFlex® Direct models. For Propane model change "N" to "P". Heights shown are to the top of jacket, 40 gallon model requires 67" minimum and 50 gallon model requires 76" minimum vertical clearance for factory provided/required coaxial vent kit. These coaxial vent kits for these models terminates horizontally through a side wall only.  
 \*\*\*No power cord required.

For models shipped from the factory with an insulation blanket there is "B" as the last character in the model number. For example: NG1F3030TB. Not all models have derivatives with factory supplied insulation blankets. Blanket Models retain the current model diameter and add a fiberglass blanket (supplied) to achieve the mandated efficiency levels. The blanket can be compressed conforming to tight spaces where a conventional rigid metal jacketed heater would not fit in.

**U.S. Craftmaster® Water Heaters reserves the right to make product changes or improvements without prior notice. Dimensions in all charts shown in inches. Dimensions and specifications subject to change without notice in accordance with our policy of continuous product improvement. Some models may not be available in all markets.**
